RETURN PRIVILEGES, POSTAGE and WARRANTIES (see website for complete information):

You have five (5) days from receipt of a pen to notify us of a return. All pens are restored unless specifically noted in the description. **Postage & Insurance are additional.** All pens are shipped insured. For shipments in the US we prefer USPS, and outside the US we prefer Express Mail International. We will of course use other shippers at customer request.

Generally, our pens are warranted for 90 days. Unfortunately, we sometimes cannot restore some modern pens (post-1970) due to lack of parts or inaccessibility to the mechanisms (many modern pen companies manufacture their pens with the plan that no restoration will ever be done). If we can't restore the pen, you *may* still have some recourse through the manufacturer or distributor. We can provide contact information for you on request. Thank you for your understanding.

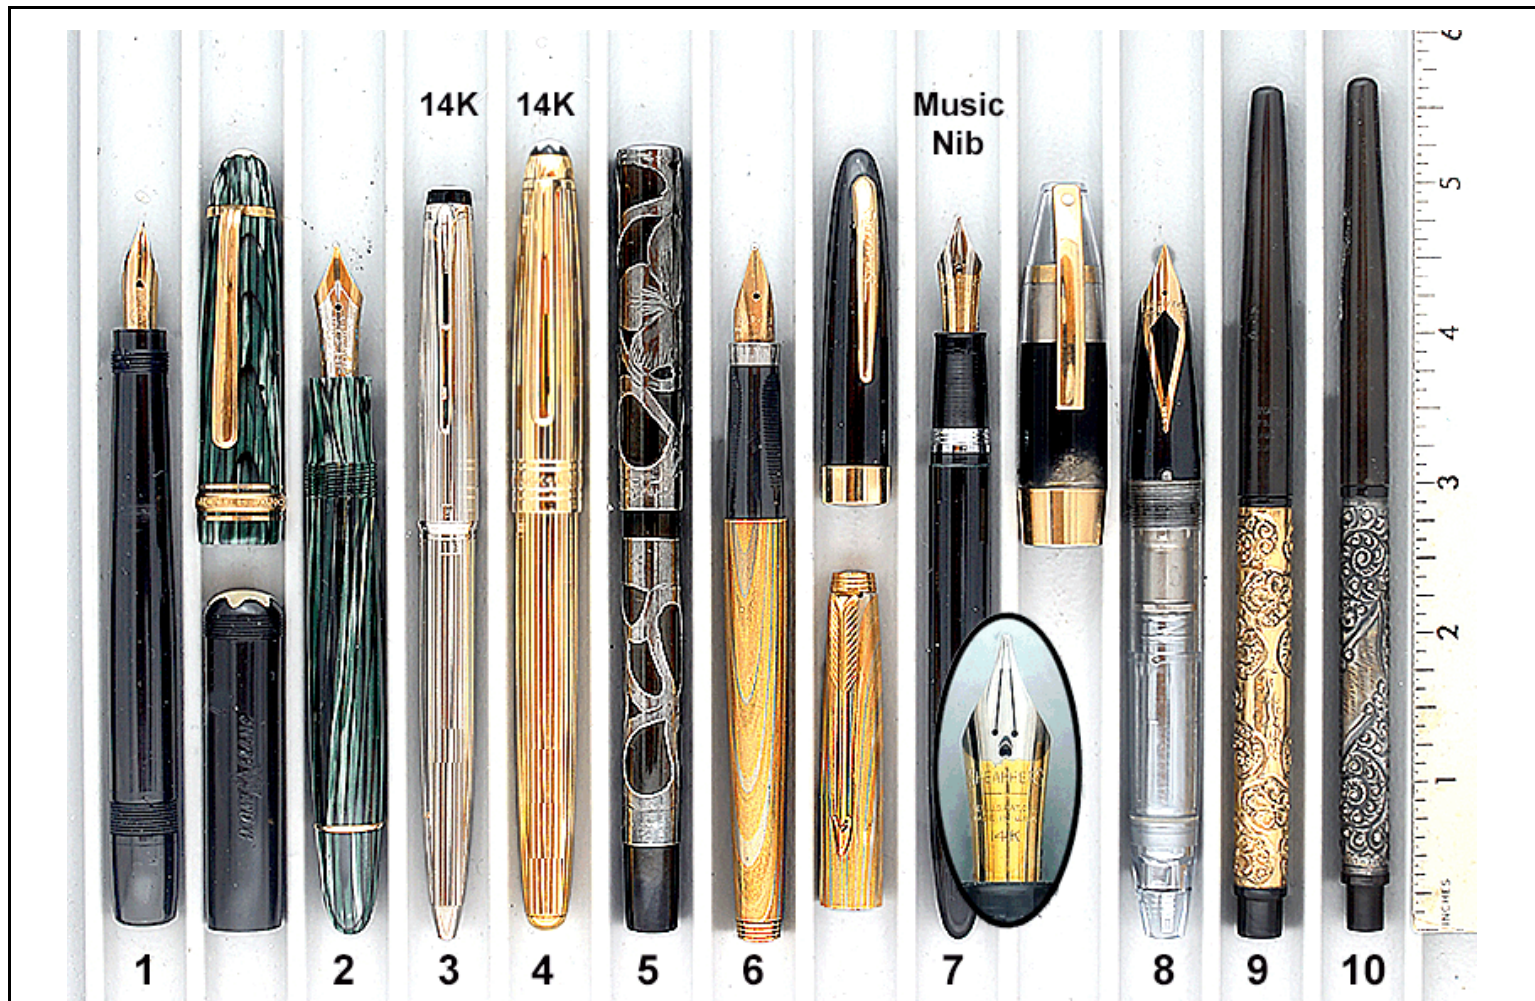

NIBS: Note: A Semi-Flex nib will flex with moderate pressure. A light hand will see no line variation.

When reading item descriptions, please assume each nib is original for its pen, and is 14K gold, unless otherwise noted.

	Extraordinary Pens			
1	Montblanc	1914	Montblanc 154 Safety eyedropper-fill in BHR. Very early model. Used Montblanc's early numbering system (later this pen would be a number 4). A rare and very special pen! Eight rows of barley knurling just above turning knob and seven rows of barley knurling just below bulbous star. Correct without barrel imprint and "MONT//\BLANC" cap imprint. The nib is MB's 1912-18 design, "SIMPLO 4 14K," with the "4" in a circle (starting in 1919 the "4" would have been inside a star inside a circle). Fine, flexible nib. Near mint+.	\$1900
2	Montblanc	1950	Montblanc 146 PIF in Green Striated. GFT. Visualated barrel. Fine, semi-flexible nib. New-old-stock. Mint in box (very threadbare, but did protect the pen for the last 70+ years). Incredibly beautiful and vibrant color!	\$2300
3	Montblanc	1961	Montblanc 98 Ballpen in 14K White Gold "Fluted." Propel-repel mechanism is in the middle of the clip. New-old-stock. Mint. Refill included.	\$1000
4	Montblanc	2010	Montblanc Meisterstuck 144 Solitaire C/C in Solid 18K Gold cap & barrel. Serial #ECO108. All parts factory imprinted "750." Two-tone 18K nib (broad). New-old-Stock. Mint in box with papers. Converter included.	\$2750
5	Parker	1905	Parker 14 eyedropper-fill in 999/1000 Fine Silver. "Filigree" pattern on Black Hard Rubber. Also came in gold-filled, the #6. The #14 was \$5.00 while the #16 was \$6.00. Both models discontinued in 1917. No.3 "keyhole-vent" nib (fine, extra-flexible). Barrel marked "Patent 6-30-91 & 1/3/05." Near mint. Will polish on request (the pen then cannot be returned).	\$1500
6	Parker	1973	Parker 75 "Regency" C/C in 18K gold-fill concentric rings in varying shades of gold. This model was never sold in the US and was available for export only. The cap & barrel required a complicated and difficult manufacturing process which resulted in many rejects and, in turn, excessive manufacturing costs. This resulted in only a two-year product life. This example was one of the first off the assembly line, acquired by Parker's Corporate Personnel Manager at the time. "67" (fine) nib. New-old-stock. Mint. Converter included.	\$1250
7	Sheaffer	1952	Sheaffer Saratoga Snorkel Touchdown-fill in Black. GFT. Two-tone, open 14K, three-tined MUSIC nib. Near mint+. Extremely rare.	\$1200
8	Sheaffer	1959	Sheaffer PFM III Demonstrator Snorkel Touchdown-fill in Clear Acrylic. GFT. These came with either a clear or a black gripping section (never in any of the other colors). Inlaid extra-fine nib. Very rare! Near mint+	\$1750
9	Waterman	1900	Waterman 0324 ½ Taper-cap ED in BHR with half-covered "Puritan Patch" overlay in GF. Crisp imprint. Indicia engraved, "FMR." Fine, semi-flexible nib. Near mint+. Try to find another!	\$2000
10	Waterman	1910	Waterman 222 Taper-cap ED in BHR with half-covered "Chased" (snail) pattern in sterling silver. Very rare model. Double-broad, oblique, flexible nib. Indicia engraved "Mayme from Clarence 1911." Near mint..	\$1500

A Page of Waterman Patricians

In the mid-1920's, as other major pen manufacturers were switching from hard-rubber pen production to the more colorful celluloids, Waterman stuck with hard rubber. They had spent a small fortune perfecting colorful hard rubber (ie. their Rose Ripple, Olive Ripple and Blue-Green Ripple), they wanted to exploit these to recoup their investment. This failed, and in 1929 Waterman succumb and introduced their first celluloid pen, the wonderful oversize Patrician. Introduced in five colors: Jet, Onyx, Turquoise, Emerald and Nacre, Moss Agate was added in 1932.

11	Waterman	1929	Waterman Patrician LF in Emerald (Jade). GFT. Medium/broad, italic nib. Almost always found highly ambered, this is an excellent example with just a touch of darkening near the top of the cap (otherwise near mint).	\$1400
12	Waterman	1929	Waterman Patrician LF in Nacre (Black & Pear). GFT. Fine nib. Almost always found highly ambered, while there is considerable ambering, it is a far better example than most found. Also with a small touch of clip and lever brassing (otherwise near mint) and well worth the "user grade" price.	\$550
13	Waterman	1929	Waterman Patrician LF in Onyx (Red Cream). GFT. Fine, semi-flexible nib. Almost always found highly ambered, this is an excellent example, the cap with just slightly more darkening than the barrel (otherwise near mint). Equipped with Waterman's "Tip-Fill" feature, allowing the pen to be filled with only the tip of the nib in ink, eliminating the need to wipe off the gripping section after filling.	\$800
14	Waterman	1929	Waterman Patrician LF in Black Hard Rubber. GFT. Fine nib. Slightest touch of surface oxidation (maybe two touches on the pencil), otherwise near mint+. This model has Waterman's "Tip-Fill" feature, allowing the pen to be filled with only the tip of the nib in ink, eliminating the need to wipe off the gripping section after filling	\$1200
15	Waterman	1929	Waterman twist-activated pencil for above set.	Set
16	Waterman	1929	Waterman Patrician LF in Black plastic. Rarer, celluloid model. This one made in Canada. GFT. Fine nib. Near mint+.	\$1200
17	Waterman	1929	Waterman Patrician LF in Turquoise (Blue & Bronze). GFT. Fine nib. Often found ambered and without sparkling bronzes, this example better than many, with just a little darkening of the cap (otherwise near mint).	\$1250
18	Waterman	1932	Waterman Patrician LF in Moss Agate (Green & Bronze). GFT. This model has Waterman's "Tip-Fill" feature, allowing the pen to be filled with only the tip of the nib in ink, eliminating the need to wipe off the gripping section after filling. Has owner's name on the barrel, "Jack Siegel." Wonderful, medium/fine, extra-flexible nib. Some clip edge brassing, otherwise near mint.	\$1150
19	Waterman	1932	Waterman Patrician LF in Moss Agate (Green & Bronze). GFT. Fine nib. Often found ambered and without sparkling bronzes, this example better than many, with just a little darkening here and there on the cap. Slight clip and lever brassing, otherwise near mint.	\$1250

56	Wahl Eversharp	1929	<i>Gold-Seal Personal-Point Pens:</i> Wahl decided they needed a lifetime guaranteed pen to compete with Sheaffer's "White Dot" pen. So in late 1928 they introduced the "Gold Seal," a disk displaying a double-checkmark, inserted into a hole drilled into the cap. At same time, they were getting complaints from dealers that they had to inventory pens with all 14 of Wahl's nibs. Wahl solved this problem by introducing the "Personal Point" nib. This was a nib/feed/threaded collar assembly which easily screwed into any pen in the product line. Now the dealer could inventory nib units along with a much reduced inventory of pens. Wahl Eversharp Gold-Seal Personal Point LF in Coral (Red with Orange Specks). GFT, including the roller-ball "soldier" clip and the metal disk in the cap-top. 72 73	Wahl Eversharp	1929& '39	<p>Wahl "XO" Pens: In 1939 Wahl went through bankruptcy reorganization. The bankruptcy referee instructed Wahl to search for every pen they could find or assemble and sell them, providing more cash for the creditors. They were not going to guarantee any of the pens sold during this liquidation period. If they put together pens with parts already having a Gold-Seal, they drilled the Gold-Seal; If the part had the drilled out hole but no Gold-Seal, they inserted a quickly manufactured seal with an "XO." "XO" is the term in the retail industry for "close-out." "XO" pens did not come with Gold-Seal personal Point nibs, but with "Warranted 14K" nibs and regular sections. These 1939 close-out pens are extremely rare and highly collectible.</p> <p>Wahl Eversharp Oversize Deco-band Gold Seal LF set in Woodgrain. The First Wahl Equipoised Pens: In 1928 Wahl introduced a streamlined pen, in both in clip and ring-top versions, to compete with the then very popular Sheaffer "Balance." Wahl advertising claimed that this shape was "...the last word in style." Very short lived (see information below about the results of Sheaffer's threatened lawsuit and the subsequent legal agreement), these are very rare today.

77	Wahl Eversharp	1928	Wahl Eversharp Equipoised Gold-Seal Personal Point LF in Black & Pearl. Very rare. GFT. "Signature" nib (fine, semi-flexible). Some ambering, otherwise near mint. Interesting that this example has a clip and a ring!	\$250

81	Wahl Eversharp	1929	Non-Cataloged Equipoised "Transitional Legal Agreement Pens." After Wahl introduced their copy of the Sheaffer "Balance" pen Sheaffer threatened to sue (after successfully suing three other companies), so Wahl agreed to change the shape. What the collector community commonly calls "Transition Equipoised" pens are non-cataloged very early pens made by Wahl to show Sheaffer that the shape was changed. These pre-Gold Seal pens with black tops and bottoms are extremely rare, the pencil with the black top is actually the rarest of the three pieces. Wahl Eversharp LF in Green & Bronze. GFT, including the roller-ball clip & "rhomboid" cap band. Correct "Warranted 5 USA" nib (broad, semi-flexible). Some brassing to the lower cap band, otherwise near mint.	\$450

A Page of Parker VP Pens				
<p><i>Kenneth Parker wanted a pen with a adjustable grip to make it fit every users writing angle. Designer Don Doman was given the job(see below). Designed with a triangular ribbed and graded gripping section and a screw-in nib unit to make it easy to change nib sizes (as was the Parker 45 before it) when introduced there were 15 different nib styles from which to select. The VP came with a glass aerometric converter which could be filled from an ink bottle and then inserted into the pen (unfortunately these broke very easily). Manufactured from 1962 to 1964, many of its design features were transferred to the much more successful successor, the Parker 75.</i></p>				
201	Parker	1962	Parker VP ("Very Personal") Glass-Cartridge-fill Demonstrator in Grey. From the personal collection of a Parker Janesville Plant Retiree. Barrel imprinted "Don Doman R & D." The bottom portion of the barrel is cut away to show the filler unit. As Design Director from 1953-57, Doman was responsible for Parker's 61, VP and 75. He then had his own design consulting firm until 1986. He was a close friend of Kenneth Parker. The VP has an aerometric filling unit in glass, designed to be removed and filled outside the pen (it also fills when within the pen). It was complicated to manufacture and had a short production life (1962-64). Brushed Lustraloy (stainless-steel) cap. GFT. Double-broad nib. Near mint.	\$450

A Page of Waterman CF Sets - All Mint in the Box

The futuristic-designed "CF" *Cartridge-fill" was designed by master designer Harley Earl of automotive fame. The pen was sold with only a cartridge, which are rare today. Each pen below comes with two cartridges which can repeatedly be refilled using a syringe (let us know if you need the syringe). They never came with a converter, although these were made separately and are excruciatingly rare today. We have enough to be able to provide one for each pen below at a small additional cost. The CF was made in the USA, UK and France, in several styles and price points. The gripping sections on the higher level models have long inlaid metal shoulders, adding to the futuristic design. Student models lack both this trim and the solid gold nibs. Matching pencils were produced and, in later years, ballpens as well.
